TECHNICAL SKILLS

Web Development	HTML5, CSS3, JavaScript, TypeScript, React.js, Tailwind CSS, Material UI, Node.js, Express.js, MongoDB, MySQL
DevOps & Tools	Git, Github, Docker, Vercel, Render
Programming Languages	C++, JavaScript

WORK EXPERIENCE

IT-NetworkZ Infosystems

Feb 2022 - Apr 2022

Frontend Developer Intern

- Gained hands-on experience in HTML, CSS, and JavaScript building the foundation for responsive web development.
- I have successfully developed and deployed basic front-end projects such as a Portfolio Website, To-Do List, Digital Clock, Calculator, and I learned the fundamentals of Salesforce CRM and explored its basic functionalities.
- Improved understanding of DOM manipulation, CSS styling, and JavaScript logic building through real-world mini projects.

Apna College

Aug 2024 - Feb 2025

Web Development Intern

- Learn about MERN Stack development and Databases.
- Developed strong JavaScript foundations including DOM manipulation, closure, promises and ES6 Concepts. Learned Git and GitHub version control, branching strategies, terminal commands.
- Build server-side applications using Node.js, Express.js and followed by MVC architecture for scalable development. Worked with both SQL and MongoDB databases.

PROJECTS

Wanderlust : (Travel and stay booking web application)

[Live Link](#) [Source Code](#)

- Developed Wanderlust, a travel and stay booking web application inspired by Airbnb, using the MERN stack along with Bootstrap, JavaScript, HTML and CSS.
- The platform enables user to explore stays, view detailed listings, and simulate booking experiences, with a responsive design and UI.
- Implementing authentication via Passport.js and email-based login and username based login.
- Successfully deployed the frontend and the backend on Render and re-structure in the form of MVC framework of project.
- Developed a fully responsive MERN stack application with Material UI, ensuring seamless user experience across all devices.

Tech Stack - JavaScript, Bootstrap, Material UI, Node.js, Express.js, MongoDB, MVC.

Nimbus : (weather app)

[Live Link](#) [Source Code](#)

- Built a MERN stack dynamic weather app providing real-time weather forecasts.
- Integrated the OpenWeatherMap API to fetch accurate, up-to-the-minute weather condition data.
- Implemented a responsive design where the website's background changes based on the current weather.
- Built a fully responsive and scalable website, deployed seamlessly on Vercel, ensuring high performance and availability.

Tech Stack - React.js, Tailwind CSS, JSX, Vercel.

GitSecure : (.gitignore generator)

[Live Link](#) [Source Code](#)

- Develop a full-stack web app that generates .gitignore files for the developer community.
- Leverage the Tiptal API to support over 550+ file types.
- Implement robust search and suggestion features to help developers find the right file types quickly.
- Ensure the website is fully responsive and scalable. Deploy the app on Vercel for optimal performance.
- Provide continuous updates to support new and emerging file types.

Tech Stack - React.js, Tailwind CSS, Node.js, Express.js

ACHIEVEMENTS

- Winner of a departmental (ACES) forum's event Quizazard platforms in
- Secured 12th place in the CodeQues Hackathon Coding Challenge.

EDUCATION

Priyadarshini College of Engineering, Nagpur

2020 - 2024

B.Tech in Computer Science & Engineering

8.1 CGPA
